

Dear Sir/Madam

Over the past six years I have been preparing for a career in software development and I am passionate about programming with a constant desire to learn new skills. In my spare time I work on personal projects, which enable me to gain further experience and understanding of programming languages and development tools.

Beginning in 2015 I attended the University of Greenwich where I worked towards and earned a degree in Game Design & Development. Throughout my time at university I would contribute to scripts and projects I found online as well as help other students where I could.

Most recently I worked for ReapSource, developing a team-collaboration website/application which included file management, goal tracking and instant messaging features. I feel this was beneficial to my growth as a programmer and allowed me to gain valuable industry experience whilst learning and sharpening my skills.

My development skills consist of frontend languages and frameworks such as HTML, CSS, JavaScript, Bootstrap, and jQuery, as well as backend languages such as asp.NET and PHP.

Thank you for your time, if you require more information I have attached my CV or you can contact me anytime on sonnykinchlea@hotmail.co.uk.

I hope to hear from you soon.

Sonny Kinchlea
